

Walkway Covers

Step Covers

Ladder Rung Covers

SAFEGUARD® Anti-Slip Covers Eliminate Costly Injuries on New Builds and Existing Platforms.

When it comes to Anti-Slip Step, Walkway, and Ladder Rung Covers for drilling platforms, Safeguard Technology is the leading innovator offering FRP/GRP composite or stainless and galvanized steel base construction; a range of Hi-Glo Traction® photoluminescent colors; descriptive messaging and logos, as well as a range of installation accessories and adhesives.

Hi-Traction® Covers PLATFORMS

Oil & Gas Exploration and Production

SAFEGUARD® Hi-Traction® Covers
The widest range of Anti-Slip Products
and Options in the World.

Safeguard Covers Since 1992

Since 1992, Safeguard Covers have proven themselves in the demanding Oil & Gas and Exploration & Production Industry. Safeguard® Hi-Traction® Step, Walkway, and Ladder Rung Covers are used everywhere slip prevention is critical.

The Safeguard Difference

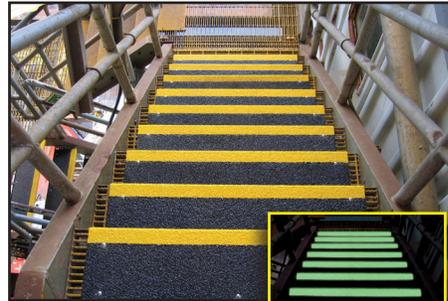

Safeguard® Hi-Traction® Covers are manufactured in the widest range of base material construction including 1.2 mm (18ga.) #316 Stainless Steel, G90 Hot Dipped Galvanized Steel, and Pultruded FRP/GRP Composite (Fiberglass). Incorporating Fused Alumina Aggregate makes Safeguard Covers durable enough to provide years of Anti-Slip protection backed by a 5 year warranty.

Six Sizes of Grit

Safeguard offers six sizes of grit. Super Coarse and Extra Coarse have become the industry standards for the Oil & Gas exploration industry. For less harsh environments such as crews quarters, shower and locker room facilities, fine grades are available.

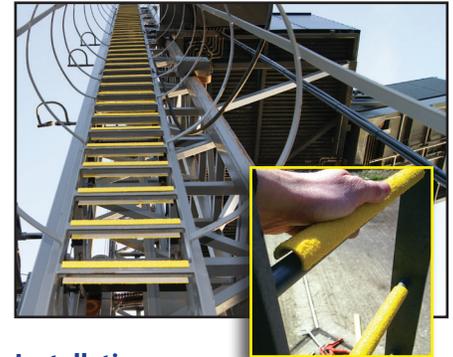

for escape routes on steps, walkways, and ladders in emergency situations. Our photoluminescent pigment is non-toxic, non-radioactive and can be recharged repeatedly during the life of the product.

One and Two-Tone Color Configurations

"Safety Yellow" is the most popular color used, but by incorporating a second color, a two-tone configuration can be created, calling attention to the leading edge. This will provide a contrast between the step edge and the back of the tread for easy definition and clarity.

Installation

Safeguard® Hi-Traction® Covers are non-load bearing, and are pre-fabricated for installation over existing surfaces, including steel and composite grating as well as solid metal, wood and concrete. Installation is accomplished using Universal Saddle Clip assemblies, Screws, Bolts and/or Adhesives.

SAFEGUARD® Hi-Traction® Covers have been used throughout the world, by these and other leading companies:

- Anadarko
- ARAMCO
- BHP Billiton Ltd.
- Chevron Corporation
- Devon Energy Corporation
- ExxonMobil
- Hess Corporation
- Murphy Oil
- Newfield
- Petronas
- Royal Dutch Shell
- Talisman
- Woodside Energy
- Apache Corporation
- BG Group PLC
- BP Corporation
- Conoco Phillips
- EnCana Corporation
- GDF (Gaz De France)

- NAM
- Petróleos Mexicanos (PEMEX)
- Qatar General Petroleum
- Statoil
- Total

Glo Yellow and Glo-Traction® Colors

Photoluminescent glow-in-the-dark colors can offer extended safety for crew members and employees when darkness falls or power failures occur. Combine Glo-Traction® Colors and safety messaging to provide critical directions

Descriptive Messaging and Logos

Safeguard was the first to incorporate PPE Safety Messaging on our complete line of Hi-Traction®, and Hi-Glo Traction® Covers. Reinforce safety with universally recognized symbols, thus eliminating language barriers. Safeguard also offers corporate logos to enhance corporate branding and reaffirm safety compliance programs.
