Grit Detail

A Portable Solution For Slips-And-Falls In Commercial, Industrial, and Offshore Applications

SAFEGUARD Technology offers Anti-Slip Floor Mats that can be put down as large section mats or built in modular configurations for custom fit applications to help prevent slips and falls. These mats offer slip resistance, portability, ergonomics, fluid resistance, and “pass through” design for particle and debris clearing benefits.

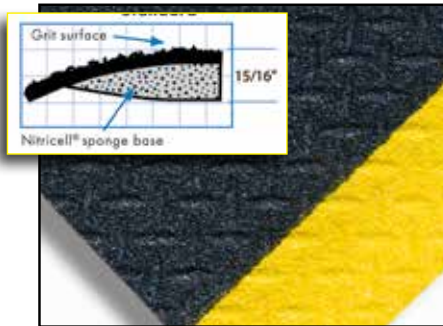

MAT-TRACTION™

Industrial Anti-Slip Mats

Mat-Traction™ combines the the renowned Safeguard Technology Anti-Slip system with the ergonomics and mobility of industrial mats to create the perfect solution in portable safety.

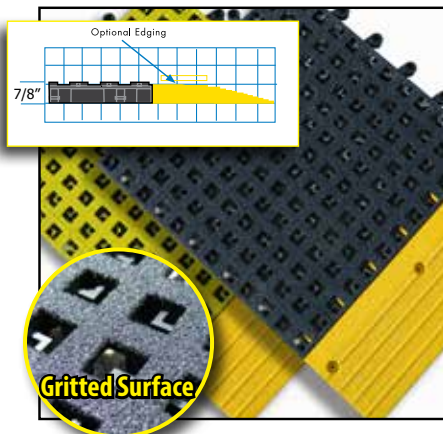

Ergo-Cushion

Thickness	Base Material	Grit Type	Application(s)	Properties	Colors	Sizes
15/16" 24 mm	Ultra-Soft nitrile rubber composite sponge	Fused Alumina aggregate: • Coarse • Fine • Extra Fine	Dry, slight overspray or oil tracking, assembly lines	Sponge base, tapered edges, high comfort, anti-fatigue	Solid black or black with yellow edging	2' x 3' 610 x 914 3' x 5' 914 x 1524

Ergo-Cushion diamond plate-style mats combine superior slip prevention with the comfort necessary for long periods on your feet. Choose the grit size that best suits your application. Available with yellow, tapered edging to aid visibility and help prevent trips.

Interlocking Tiles (Hard or Soft)

Thickness	Base Material	Grit Type	Application(s)	Properties	Colors	Sizes
7/8" 22 mm Hard	100% Silicone-Free PVC	Fused Alumina aggregate: • Coarse • Fine • Extra Fine	Heavy use and cart traffic	• Easy to connect tiles • Open holes for drainage	Yellow or black with optional yellow edging	Modular 18" 457 mm tiles, connect tiles as needed
7/8" 22 mm Soft			Wet, oil, overspray areas	• Emphasis on comfort • Easy to connect tiles • Open holes for drainage	Gray with optional yellow edging	

Interlocking Tiles form an anti-slip flooring system designed for quick assembly that provides a seamless installation ideal for any size area. Choose from durable **HARD** tiles, intended for heavy use and cart traffic areas or **SOFT** tiles for increased ergonomics and worker comfort. Also, select the grit size to suit your application. Optional yellow ramps and corners are available on both to aid visibility and help prevent trips.

Optional Edging Ramps

Optional yellow edging for Interlocking Tiles

Improve safety and visibility - optional Safety Yellow ramps, edging, and corners are available for **Interlocking Tiles**
